

# Titanium Wedding

With titanium we give shape to the moments  
you don't want to forget, so you can  
remember them over time  
and share them with your loved ones.

Titanium is

Light

Rustproof

Anallergic

We use titanium to  
make wedding rings,  
engagement rings,  
favours and gifts.

We work both on our designs and ideas proposed  
by customers.

We realize different  
colours and surface  
finishings.

We often work on custom projects and diamonds  
or other gemstones settings.

We will give to your memories the lightness  
of titanium and rust-proof over time.
